

Die Registration System

Die Co-Ordinator from Diversified Graphic Machinery (Booth 258) is a prepress die registration system that allows you reduce overall setup by more than 50%. Die Co-Ordinator works with all flatbed platen foil stamping and embossing presses that have removable honeycombs. It requires no modification to presses, honeycombs, dies, or hooks.

The Die Co-Ordinator digitally locks up your foil stamping and/or embossing dies from your digital print file onto your Honeycomb. It has the ability to lock up presses up to 60".
