

DGM Receives Certificate of Registration for Foildex Cold Foil Technology

Diversified Graphic Machinery (Booth 867), innovators of cold foil print enhancement technology for the global print packaging market, has received a Certificate of Registration for FOILDEX by the U.S. Federal Patent and Trademark Office.

“All of us at Diversified Graphic Machinery are ecstatic having received registration for the Foildex mark, a process than began over four years ago and was a major goal and milestone for our company,” says Michael DeBard, President, Diversified Graphic Machinery.”

DGM is introducing its new compact designed Foildex® “Plus” Cold Foil Indexing Application System at GRAPH EXPO.
